Broiler Eggs Set in 15 Selected States Down 1 Percent

Commercial hatcheries in the 15-State weekly program set 140 million eggs during the week ending July 4, 1992. This was 1 percent below the eggs set the corresponding week a year earlier. Average hatchability for chicks hatched during the week was 83 percent. Average hatchability is calculated by dividing chicks hatched during the week by eggs set three weeks earlier.

Broiler Chicks Placed Up 2 Percent

Broiler growers in the 15-State weekly program placed 119 million chicks for meat production during the week ending July 4, 1992. Placements were up 2 percent from the comparable week in 1991. Cumulative placements from November 3, 1991, through July 4, 1992, were 4.00 billion, 3 percent above the 3.90 billion placed during the same period a year earlier.
